

Faculty Class Review Report

SYNTHETIC DEMO - selected cohort snapshot

Students: 500. Scored records: 500. Mean success score: 72.6 / 100.

193 students warrant review under the demo rules. Academic checks flagged 147; career-practice checks flagged 89. Categories overlap. Missing required evidence: 0.

Class segments

Strong academics - career practice needed: 9 / 500

No current demo flags: 307 / 500

Academic support suggested: 145 / 500

Career practice suggested: 39 / 500

Suggested action

Prioritize conversations about the specific indicator below its threshold. Confirm the source data before intervention. Strong academic results with a low coding assessment suggest targeted career practice rather than a broad academic judgment.

Methodology

Success is the sum of normalized indicators times their weights. CGPA: 25% weight, review below 6; Attendance: 25% weight, review below 75; LMS marks: 25% weight, review below 50; Coding: 25% weight, review below 50. Demo rules are illustrative; no calibrated academic or placement predictions.
