SYNTHETIC DEMO - illustrative rules, not validated predictions

Success score: 77 / 100. Combined review index: 25%. Review suggested

Readable interpretation

Your technical evaluation score currently sits just below the standard demo review threshold. Discussing this specific result with your faculty advisor will help clarify your path forward. This conversation offers a concrete opportunity to strengthen your programming skills and approach.

Numerical evidence and visual comparison

CGPA: 8.2 / 10

Attendance: 89 / 100

LMS assignment marks: 89 / 100

Coding assessment: 48 / 100

Review reasons and practical actions

Coding assessment 48/100 is below the demo review threshold 50/100. Review feedback and agree a focused improvement plan with faculty.

Student Progress Report

Method, evidence and limitations

The demo success score is the sum of normalized indicator percentages multiplied by the configured weights. All four indicators are required. The review index is triggered checks / assessed checks x 100, not failure probability. No institution-approved policy means no real-account score.

CGPA: weight 25%; contribution 20.50 points.

Attendance: weight 25%; contribution 22.25 points.

LMS assignment marks: weight 25%; contribution 22.25 points.

Coding assessment: weight 25%; contribution 12.00 points.

Portfolio: 3 self-reported skills; 1 projects; 0 achievements. Unverified evidence does not add score points.
