

Faculty Class Review Report

Cohort snapshot | 500 students | SYNTHETIC DEMO DATA, illustrative rules only

Class segments

Review load by department

Department	Students	Mean	Review
Nursing	61	72.1	28
Journalism	62	72.7	26
Artificial Intelligence	65	73.0	25
Business Administration	62	72.1	25
Computer Science	64	72.9	24
Commerce	62	72.6	23
Mechanical Engineering	62	73.0	22
Biotechnology	62	72.6	20

Suggested action and method

Prioritize the indicator below its threshold and confirm source data before intervention. Strong academics with a low coding assessment suggest targeted career practice. Academic and career counts overlap; the combined review count includes each student once.

Score = sum of normalized indicators x configured weights. CGPA: 25% weight; flag below 6 | Attendance: 25% weight; flag below 75 | LMS: 25% weight; flag below 50 | Coding: 25% weight; flag below 50. Review index = flagged / assessed checks x 100; not failure probability.

Priority review list

56 students with two or more flagged checks (review index 50% or higher), highest review index first.

CGPA / ATT / LMS = academic checks; CODE = career practice. Missing sources are not zero. Review is the share of assessed checks flagged.
